Key Features & Specifications for the APS 3000 Series

- Output Power: 3 kVA to 180 kVA
- Output Frequency: 45-500 Hz (also available: 360-440 Hz)
- Output Voltage: Dual range, 150/260 V or 300/520 V, 3 phase
Optional 300V/600V_{LN} ranges available
- Isolated Output, THD: < 1%
- Input Requirements: 208, 220, 240, 380, 415, 480 VAC
± 10%, 3 phase, 47-63 Hz (3kVA and 6kVA models require 230VAC ± 15%, 1 phase; 90kVA through 180kVA models require 380VAC or higher)
- Intuitive Front Panel Controls: Frequency and Voltage
- Easy to Read LED Displays: Frequency, Voltage, Current, Power and Power Factor
- Memory Locations: Can save three desired settings of any voltage, frequency and current limit output parameters

The APS 3000 Series frequency and voltage converters are economically priced and offer top of the line performance.

The series consists of eight 3 phase output instruments ranging in size from 3 kVA to 180 kVA. The converters allow the user to duplicate a utility grid of either 50 or 60 hertz for export product testing or operation of imported equipment. The frequency can be adjusted to 400 hertz for applications such as the testing of military/avionics equipment or for the operation of 400 hertz electronics that are onboard an aircraft or a military vessel. The adjustable frequency band of 45 to 500 Hertz in conjunction with the dual line to neutral voltage ranges of 0-150 volts or 0-300 volts provides full capabilities for testing and operating electronics worldwide.

Setup and operation of the APS 3000 Series is exceptionally easy. The simple front panel layout allows users to continuously vary voltage and frequency or to select preset standard frequency settings. Individual meter displays provide digital readouts for frequency, voltage and current while a digital multimeter displays power or power factor.

The APS 3000 Series converters are a simple and cost effective solution for all of your AC power conversion needs!
